August 26, 2014

To our valued customers,

Effective immediately Bouchard Livestock International will no longer be representing and handling the Neogen / GeneSeek Homozygous Polled & Coat Color DNA Test.

Due to changes in how DNA services are being offered in Canada and as a result of customer feedback we at BLI have decided to no longer offer DNA Testing through our company.

Thank you to our valued customers that have used this service in the past. We thank you for the opportunity to help move your program forward; we look forward to assisting you with any other services offered by Bouchard Livestock International.

For testing in the future please contact your breed association or Neogen / Igenity Directly at <http://www.igenity.com/> or Call 402-435-0665

For all other questions please contact:
