Insurance

An insurance agent will be available to assist you. We encourage you to take responsibility for protecting the value of your livestock in transit.

Transportation

Preston Stock Farms and Jersak Simmentals can assist you in arranging delivery of your purchases. For those of you who would like us to deliver your purchases, please contact the individual consignor. We will do everything we can to make it as convenient and economical as possible for the buyer.

Announcements

Announcements at the sale by the owners, auctioneer or sales management will take precedence over the information provided in the sale catalogue.

EPD's

EPD's may change from the time the catalogue is printed until the time registration papers are transferred.

Catalogue Information

EPD's are current and up-to-date as of publication date. Information in this document is believed to be accurate but any updates from the auction block will take preference. Pedigrees in this document have been supplied by the Breed Association and all other information has been supplied by the seller.

Terms & Conditions

Cattle will sell under the standard Canadian Simmental Association Sale Terms & Condition, these are available on request.

Catalogue Production

Anchor B Printing

Welcome to the Preston Stock Farms and Jersak Simmentals Dispersal Sale. We at Bouchard Livestock International have had the pleasure of buying and selling Simmental cattle for these two true family operations. When I had my first meeting with Allan and we discussed his plan to disperse the cowherd, he made the comment, did I know of anyone we could include to add a few more numbers. Just as we were having this discussion in the coffee shop at the Canad Inns in Brandon, Tim and Grace Jersak were walking by and stopped to say hello. When Tim and Grace left it seemed we both had a similar thought as Tim had indicated some time earlier that he may make some major changes to his cattle operation in 2010. From these very fruitful discussions evolved this neat opportunity to purchase cattle from the heart of two of the long term breeding establishments. The cattle will come to you bred right up and preg checked to leading AI sires and or proven walking herdbulls. As you page through the cattle you will observe both the entire breeding programs will be up for public auction. The only animals not in the sale are a few older cows in their teens and a handful of later born heifer calves.

There is no doubt in my mind these are the kind of families we desperately need to keep involved in Agriculture especially livestock, but having said that, this next generation are the kind of young people everyone would love to have in their workforce. Young people that learned how to work from their parents. The one consolation both Tim and Allen assured me these two farms would also have some cattle grazing the pastures and I'm betting they will be of some Simmental influence.

I certainly want to thank the Prestons and the Jersaks for the opportunity to be a part of their dispersal. Also I want to wish every member of both families all the best with future endeavors. And as we discussed hopefully it will facilitate a bit more time to spend with and enjoy with the grandkids. It doesn't get any better than that.

Please take the time to call the Prestons and Jersaks about their great set of cattle. We at Bouchard Livestock as well as Wilf Davis are very familiar with both these cowherds and would welcome the opportunity to visit with you. If for any reason you are unable to attend please give us a call and we would be happy to represent your interests in a professional manner. Hope to visit with you in Virden on October 30, 2009.

I appreciate being given this opportunity to provide a few comments on the sale offering being presented by long time friends and business colleagues, the Prestons and the Jersaks.

It has been a pleasure to be involved with many sales where the production of these herds was marketed to the cattle industry. Their bulls and females were always popular and easy to sell, commanding many top prices.

Both programs have paid close attention to the needs of the beef industry and guided their breeding programs to produce cattle which would work for their customers. Culling programs have been strict and selection of herd bulls always received serious attention. On October 30th, I think you will like the product developed by the many years of progressive cattle breeding required to build these herds.

Having recently visited the Preston herd to take sale photographs, and having seen the Jersak spring and fall sale offerings, I encourage you to attend this event which provides an exceptional opportunity to invest in beef cattle right for the times and designed for the future.

It is unfortunate that the Prestons and Jersaks have decided the time has come to disperse their herds. Their exit from the Simmental business will be felt throughout the beef industry. On the positive side, cattle producers will have the opportunity to purchase and use the genetics which have made these herds successful.

If you wish to discuss these cattle and programs prior to or sale day, please give me a call.

Preston Stock Farms Ltd. – Herd Dispersal 2009

I find it really hard to believe that I am actually writing the welcome to the herd dispersal for Preston Stock Farms. Although every breeder knows in the back of their mind that the day will come, when it is indeed “your turn” – it’s a reality check bar none. However, the passage of time, the advancing years, the competing professional choices for both Scott and I, and the pressing need to spend more time with our family as it expands and grows, all conspire to make dispersing our herd the right thing to do, and October 30, 2009 is the right time.

We’ve been at this purebred cattle business for two months shy of thirty four years. It all started with the purchase of five half blood cows from Bar 5 (Wilf – remember 93C – she wasn’t supposed to go home with me that December day in 1975). My father reluctantly supported me in this new endeavour, doubting that these Simmentals had anything to offer that his Herefords couldn’t provide. I can honestly say as the Simmental calves started to arrive, started to grow and gain so dramatically, Dad did change his mind and agree that our breeding program did indeed have some merit. From five cows, we have continued to grow and expand to the current 100 +/- breeding females that we are offering to the industry today.

Along the way, we have used a range of AI sires to diversify our program, but, more than anything else, we have gone out and found the herdbulls on which to build our program – MJ Stemwinder 5S, Bar 5 Sir General 605W, Sunrise Gold Rush 27Z, Four Island Dusty 990Z, Bar 5 Bottomline 374C, Bar 15 Pasco 48E, Porterhouse Justice 80J, IPU Red Warrior 29N, and Black Diamond 32S. That select group cost us a very significant amount of money – but it was a composite investment that returned dividends over and over again. I’ve always believed in the value of outstanding walking herdbulls, and I’ve always put a lot of effort into seeking out the great ones, with great cow families to back them up. In the past two years, we have ventured away from the fullblood side of our program, using Warrior and Bombshell as our two walking red sires.

We are offering you quite a mix of cattle, quite a mix of program options – from the very strong set of bred heifers to the spring calving cows, to the open 2009 heifer calves, and the fall cow-calf pairs. Also on offer for your consideration are four yearling bulls and two bull calf prospects. The only critters that stayed home are the geriatric set – 10 years and older, and a few of the heifer calves off of those older cows. There will always be some cattle around the PSF place – just a lot less than what we have been used to!

Enough about cattle – I would be remiss if I did not mention the people side of this business, for that is really what keeps us all engaged for so long. We’ve had the good fortune of being associated with a lot of great “partners” over the years, starting with the West Central Simmental Association where we cut our teeth in merchandising our cattle. We hooked up with Woodsong Farms, Ralph and Averill Whitfield and family, along with Bob Duncan, Thiessen Stock Farms, Circle T Simmentals and More Bros. in the All-Star Sales for a lot of years. Bob, Dean Henuset and I sold bulls in the Top Cut Bull Sale in Pipestone for a few years, and we trailed bulls to the Royal Manitoba Winter Fair Bull Show and Sale for 20 years. We were founding consignors for the Premium Bull Sale, and took part in the Manitoba Simmental Association bull and female sales on many occasions. And, of course, the Harvest Hoedown Sale for the past 14 years has been a mainstay for us. Along the way, we have taken part in a lot of shows and exhibitions as our family grew up in the Simmental fraternity. Through 4-H and the Young Canadian Simmental Association, Scott, Shelley and Julie all became accomplished cattle people, and cattle breeders. And, through my tenure on the Canadian Simmental Association, we have met and become friends with Simmental folks from one end of the country to the other, as well as into the United States, Mexico, Brazil, Germany and the United Kingdom. We may be getting out of the hustle and bustle of breeding Simmental cattle – however, I sincerely hope that we never get out of the “business” of having friends and colleagues in the cattle business for a long, long time to come.

Our sincere thanks to all of our loyal customers over the years – your success has made our business, our program a success. And may every sale lot that you take home with you today continue that pattern of success. The Preston’s thank you for your attendance today. And, with the added privilege of having Jersak Simmentals dispersing with us today, Tim, Grace and their family thank you as well.

We selected Bombshell out of the Rebels sale two years ago, looking for a calving ease sire to use on the Warrior daughters. We threw him in with a pen of heifers, and did he ever perform!! He got the group bred in record time, and when calving season 2008 rolled around, all of our expectations came true. I can honestly say that I have never used a bull that calves so easily, with calves that are up and at it before you can blink. Then came the bonus of some pretty impressive heifer calves at weaning time. Take a look at the Bombshell heifers in the offering - there are a couple for sure that are indeed the "picks of the litter". We were going to sell Bombshell but decided that he had earned the right to stay at home, breed the few old cows and younger replacement heifers that did not make it into the sale.

We bought Warrior out of the Labatte sale with Schweitzer Simmentals back in 2003 – and he has never disappointed us. He calves easy, puts performance into his calves, polls them all, and paints them pretty much solid red. And, to top it off, his bull progeny are very easy to market, and his daughters have proven to be very good momma cows. It takes several years for a sire to demonstrate that he can "do it all" – Warrior has achieved that level of success.

Yearling Bred Heifers

We are very pleased with the depth of this group, the strength of the genetics and the phenotypical representation of those genetics. I could use the words – broody, feminine, angular, deep bodied, tremendous capacity – over and over again on successive lots. We synchronized and AI'd the heifers in early May, with pretty good results. And we have used a variety of sires, focusing in on Bravado and our Bombshell bull for their excellent calving ease. Buy with the confidence that these heifers will be herd builders for you. The Bombshell heifers ran with Warrior until the end of July; the balance of the group was with Bombshell until July 31st. We pregnancy tested on September 6th – the results listed reflect that date.

1U is without question a feature lot amongst the bred heifers and the entire sale. She is several generations polled and red, and will be an excellent producer and front pasture cow.

Bred June 29 to Warrior. Preg tests 2 months.

Mature Cows

We have added some brief comments on individual lots, but, as an overview, we are pleased to provide you with an offering of sound, proven, predictable cows that have proven their worth at our farm. These cows come to you carrying services to some popular industry sires such as Wheatland Bull 680S, Red Teddy, Warrior and our Bombshell bull, all bred in a pretty tight window from early May to mid July. There is strength in every age group, but especially so in the S and T cows – it is indeed true that the younger cows show the advancement of the breeding program. Take a particularly close look at the group of Body Builder daughters – 36L, 2L, 21R, 25S, 22S, 10S – here are some cows that will continue to impact the industry for their new owners. The T and S cows, along with 1R, ran with Bombshell until July 31st. The mature cow group ran with the young Hurricane bull, ASP 3U, from June 6th to July 31st. You will note that only three lots are carrying services from that exposure. As with the heifers, the cows were pregnancy tested on September 6th – the results are noted as of that date.

22S is another BodyBuilder daughter. She may be one of, if not the best producer is the sale. Be sure to check her yearling Bombshell heifer; additionally we thought enough of her Hurricane bull calf to include him in the sale. The Red Teddy calf she is carrying could be her best calf yet. P.S. don't let 22S short tail scare you away – she was born inside, however, for whatever reason the lower part of her tale froze this past winter – I'll guarantee that all of her calves will have longer tails! Again 22S could be the best investment in the entire sale.

Bred May 9 to Red Teddy. Preg tests 4 months.

ASP 22W – 22W is a solid red polled Warrior heifer and typical of the progeny that 36L has raised over the years. Mark her as a matron in waiting.

36L an excellent BodyBuilder female that has always been one of our favorites. She regularly raises one of the best calves every year. She is still a very youthful looking cow who has several productive years of life a head of her. In 2007 one of her sons was a high selling bull in the Premium Beef sale at \$6500 going to M&J Farms. Bred May 9 to Red Teddy.

Preg tests 4 months.

ASP 39W – an outstanding Warrior heifer calf

Cow – Calf Pairs

Through a combination of management, both good and bad we have a small group of early fall calvers for your consideration. We have elected to sell only those that had calved by the time the catalogue was prepared. All the calves are sired by the Bombshell bull. Take a close look at 7S and 9S, both with heifer calves at side. You will go a long way to find young cows as good as these two Body Builder females – they are herd builders no matter what time of year they have a calf.

Lot 79

Preston Stock Farms

Bulls

We have been a bit removed from the bull business the last few years due to work commitments. We did not market our bulls aggressively this past spring with the result that we have a few herdsire prospects available for you in this sale. And we are bringing you two select bull calf prospects – green as grass, but with genetic potential to burn. Buy now, let us take them back home and winter for you, if you like, then turn ‘em loose come springtime.

Never forget the old adage that good bulls have great mothers – 36L is probably one of the top two or three cows in this offering, she has done it before, popping out the high seller that went to M and J Farms from the Premium Bull Sale. This big, rugged rascal will breed a lot of cows next spring, and he will produce bulls and heifers of equal quality.

This Warrior son was the first "go" for the 25S Body Builder cow, and she did a bang up job, producing a thick, moderate framed, loose hided bull with lots of grow in him. We try pretty hard to produce bulls that can do an equally good job on replacement heifers, bull prospects, as well as market steers – but this guy will excel for sure in the replacement heifer category. The maternal traits are well stacked to make that happen.

Here's a Hurricane son out of a Topline/Body Builder female that has the potential to be a herdsire. Some of the best bulls are line bred to intensify the most desirable traits – and who better to stack in a pedigree than Body Builder? This calf will breed about as true as you will ever want, imprinting maternal traits, the red and polled factor, over and over again in his offspring.

Here is a very good Hurricane son out of another of our favorite Body Builder cows, more of that line breeding approach that we take to intensify the genetics in our bulls. This guy is rugged, full of meat in all the right places, and he has a pretty even temperament to round out the package. He will go to work in your breeding program this fall or next spring – no fuss, no muss, no hassle.

This Warrior son is out of the same dam as the 7W bull calf – she can certainly produce the good ones. This bull is moderate framed, loose hided, easy keeping – the kind of bull to sire those solid red, polled steer calves that you can package up and top the sale with come fall. And they will press down pretty hard on the scales as well!!!

Welcome from Jersak Farms

Our family would like to welcome you to our dispersal sale. We want to thank you for your continued interest and support in our program. You have helped to make the past twenty three years of breeding and raising Simmental cattle a rich and rewarding experience. We consider it a privilege and pleasure to disperse our herd in a combined sale with the Preston family. We would also like to thank Brian Bouchard and staff of Bouchard Livestock International, as well as Wilf Davis, for assisting us in marketing our cattle to their best potential.

From our original commercial herd we moved forward by starting and then continuing to use industry leading A.I. sires, as well as a powerful battery of pedigreed wading herd bulls. These bulls have included Bar 15 Riviera, MFI Mohican 76M, MRL 65P, KOP Northern Son 48R, and Sunny Valley Rocket 39S. For maximum marketability and producer choice we have crossed the red factor and flechvieh cattle to reach their most complimentary potential, including milk production, growth performance, color, and the polled factor. Also on offer we have a strong group of black females including the cow used as our donor flush cow.

To maximize our herd health program, calves have been vaccinated with Pyrimid and Vision 7 Somseus; cows and heifers with Bovashield Gold FPS prior to breeding. The bred heifers will all be vaccinated with their initial dose of Scour Boss.

We have every confidence that our cattle will work for you in your herd. If you have any questions please feel free to call us. We look forward to meeting with you on sale day.

Tim & Grace Jersak
